## FOR IMMEDIATE RELEASE

### Intercomp Aircraft Scales are the Preferred Choice of Viva Aerobus

Minneapolis, MN – Intercomp, the world’s leading manufacturer of aircraft weighing systems, is pleased to announce that Viva Aerobus, a Mexican airline operating one of the biggest Airbus fleets in Latin America, has completed another purchase of [AC40-LP™ Low-Profile Aircraft Scales](#). This acquisition reinforces Intercomp’s history as a proven supplier of aircraft weight and balance equipment for the airline.

In 2017, Viva Aerobus selected Intercomp’s AC40-LP™ scale when they brought weighing operations in house. The AC40-LP™ were chosen due to their easy-to-use platforms, the accuracy and reliability that Intercomp’s scales are known for, and the integrated software options. Since their original purchase, Viva Aerobus has been highly satisfied with the quality of the product and with the customer attention they receive when they have questions about their scales.

Constructed from aerospace-grade machined aluminum to handle heavy operational demands, the AC40-LP™ scale features a low-profile design that eliminates the need for long ramps and reduces overall towing distance. Intercomp’s industry-leading fully electronic load cell technology eliminates scale warm-up time, mitigates side loads, and removes the need for centering of tires on the active weighing platform. With 0.1% accuracy and the highest levels of repeatability, Intercomp aircraft scales are built with technology designed from NTEP and OIML certified components - the most trusted weighing technology for any load-sensing application.

The recent purchase of an additional set of AC40-LP™ scales will enhance Viva Aerobus’s weight and balance programs for years to come. As the manufacturer of aircraft scales and load cell equipment most widely used by airlines, MROs, and airframe manufacturers in the world, Intercomp continues to provide state-of-the-art, fully electronic aircraft weight and balance equipment unmatched in quality, performance, and support.
